# TURBINE ENGINE PARTS REPAIR

## TURBINE ENGINE PARTS REPAIR

TAE has a strong reputation as a specialist turbine engine parts repairer, specialising in electroplating, automated shot peening, heat treatment, robotic plasma spraying, welding, machining, precision grinding and non-destructive testing (NDT).

With complete in-house capability, TAE can undertake most turbine engine parts repairs and modifications.

As the region's preeminent turbine engine MRO provider, you can be assured that TAE's parts repairs are done to the same exacting standards for engine maintenance, on which TAE has built its reputation.

**The TAE Group offers the broadest range of services in the aviation industry with a strong emphasis on responsive service, on-time delivery, product reliability and outstanding value.**
